

**BENEFITS:**

- Integrated with CADWorx.
- Total control of label layers.
- Uses existing details and block libraries.
- Annotates native AutoCAD viewports.
- Supports CADWorx-created viewports.
- Supports nested xRef attachments.
- Support for AutoCAD UCS.
- Automated column grid references.
- Detailed, online documentation.
- Delivered with 40 predefined styles.
- Flexible user interface.
- Drawing styles saved for future use.
- Easily enforceable project standards.
- Simple repositioning of labels.
- Label moves preserved on updates.
- Fast annotation space allotments.
- User-defined enclosure cells.
- Automated match-line labels.
- Locations shown as coordinates or dimensions.

**3DS NET ORTHOGEN® FOR INTERGRAPH® CADWORX® PLANT PROFESSIONAL**

OrthoGen® for Intergraph® CADWorx® Plant Professional enables 2D plans, sections, and elevations drawings to be created automatically from CADWorx Plant Professional 3D models. Even in today’s 3D world, annotated and dimensioned orthographic drawings are still a required deliverable. OrthoGen reduces this process from hours to only minutes.

**Integrated with AutoCAD® and CADWorx®**

The OrthoGen integrated drawing interface quickly reads properties directly from CADWorx model files. Because OrthoGen operates within the AutoCAD environment, users can auto-annotate and conduct other 2D embellishments through AutoCAD viewports. OrthoGen also integrates well with existing user-developed CADWorx commands, details, standards, and block libraries.

**Multiple AutoCAD viewports and xRefs**

OrthoGen enables the use of multiple AutoCAD viewports and utilizes data from xRefs up to three levels deep. Because of this flexibility, users can create drawings representing multiple scales and views. OrthoGen is tightly integrated into the AutoCAD environment and supports the AutoCAD User Coordinate Systems (UCS).

**Flexible settings and standards creation**

The user interface enables users to select from thousands of option combinations. These combinations can be saved as drawings styles for future individual or group use. In addition, the production mode interface provides easy enforcement of project standards. To ensure user productivity, OrthoGen comes with 40 predefined and editable drawing styles, so users can be up and running in no time.

**Easy label repositioning and modification**

When using OrthoGen in the CADWorx environment, you can take advantage of basic AutoCAD commands to move and rotate labels. What is special is that these edits are preserved when running updates on the drawing, eliminating unnecessary rework. Users can also add additional dimensions, hatching, notes, details, and more using basic CADWorx and AutoCAD commands.

## Automated column grid references

Creating a single grid model helps to coordinate and automate the placement of grid labels for all drawings on a project. Grid models provide a firm dimensional base that helps eliminate guesswork and the introduction of errors.

## Annotations where you want them

The fast, high-resolution, white-space search algorithms enable you to generate orthographic representations that will automatically avoid areas that you do not wish for dimensions or annotations to appear. Commands also help define dimension “edges” on the drawings.

## Technical Specifications

- AutoCAD-compatible
- Microsoft® Windows®-compatible

## Application Areas

Process and Plant Design, Piping, Equipment, Steelwork, Petrochemical, Chemical, Power, Offshore, Food, Beverage, Brewing, Pharmaceutical, Water Treatment, Building Services, Shipbuilding, and Architectural.

## ABOUT INTERGRAPH

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data to make processes and infrastructure better, safer and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: Process, Power & Marine (PP&M) and Security, Government & Infrastructure (SG&I). Intergraph PP&M provides enterprise engineering software for the design, construction, operation and data management of plants, ships and offshore facilities. Intergraph SG&I provides

geospatially powered solutions, including ERDAS technologies, to the public safety and security, defense and intelligence, government, transportation, photogrammetry, and utilities and communications industries. Intergraph Government Solutions (IGS) is a wholly owned subsidiary of Intergraph Corporation responsible for the SG&I U.S. federal business.

Intergraph is part of Hexagon (Nordic exchange: HEXA B; [www.hexagon.com](http://www.hexagon.com)), a leading global provider of design, measurement, and visualization technologies that enable customers to design, measure and position objects, and process and present data.
